Year 6 Newsletter

October 2026

After a rocky start we are now back to normal and working as hard as ever.

This month we will be completing our poetry unit with our assembly, reciting poems that we like and also the limericks we have composed ourselves.

In the English lessons we will be looking into the English coastline and the many wonders of marine animals.

We will learn how to find information in a text and try to make notes. We will learn about relative clauses and revise the use of punctuation. We always check and improve our written work.

In Maths we will move on to adding decimals, including money, using the frog method, and then dip our toes into algebra and finding missing numbers. We will also look at how to use brackets.

In Science we will continue with micro-organisms. We will look into food hygiene and preservation. We will also find out about food chains.

In our Geography lessons we have found out the main rivers around the world. We will now learn about the features of rivers and then go on to finding out about a river of our own choosing to make a fact file.

If you have any questions or concerns, please feel free to contact the administration office and make an appointment, or you can contact me on ClassDojo. I look forward to meeting you.
