Year 6 Newsletter

September 2026

Welcome back everyone. A new year is starting, with high hopes. We have a lot of work to do!

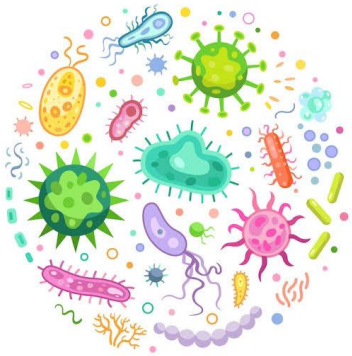
The plan for the month is as follows:

in English we will be concentrating on poetry. Roald Dahl Day is on 13th September and we will be reading poems that he wrote as well as some of his famous books. We will be learning about different types of poetry. We will even try to compose our own!

We will be revising grammar rules, conjunctions, and relative pronouns as well as learning how to check and improve our written work, something that will continue throughout the year. A very important part of this is handwriting; the children will be expected to write clearly and in cursive.

In Maths we start with simple revision of place value, rounding whole numbers and decimals, multiplying and dividing by multiples of 10, and addition of whole numbers and decimals. It would be a great help if the children start to revise these things on their own too.

In Science we will be investigating micro-organisms. We will discover the uses, good and bad, of viruses, bacteria and fungi. We will look into hygiene and food preservation.



In our Geography lessons we will be investigating rivers. We will learn where they come from, what they are used for, and how they have affected the growth of towns and cities.

If you have any questions or concerns, please feel free to contact the administration office and make an appointment. I look forward to meeting you and getting to know your children.
